EDITORIAL #4**SAUCERS, SPACE & SCIENCE**
By Gene Duplantier

In 1957 a wave of saucer sightings engulfed the U.S. and Canada. At this time I realized I knew of no UFO bulletin in Canada at the time but the U.S. had many organizations and other countries in the world had at least one to cope with the situation. I felt it was up to me to start the ball rolling and to inform these other groups about sightings and related phenomena in Canada.

Thus was SAUCERS, SPACE & SCIENCE born in November, 1957. Now SS&S is in its 6th year reporting the facts as gathered through its many and varied sources.

Fortean items; space humor; monster stories; ghost tales; listings of new space bulletins; movies and records; and saucer articles by well-known writers in the saucer field help contribute to make it one of the better UFO periodicals known today.
